

DATA C101 - Data Engineering

Overview

Subject

DATA

Course Number

C101

Department

Data Science Undergraduate Studies

Course Level

Undergraduate

Formerly Known As

DATA 101

Course Title

Data Engineering

Course Description

This course will cover the principles and practices of managing data at scale, with a focus on use cases in data analysis and machine learning. We will cover the entire life cycle of data management and science, ranging from data preparation to exploration, visualization and analysis, to machine learning and collaboration, with a focus on ensuring reliable, scalable operationalization.

Units

Minimum:

4

Maximum:

4

Grading Basis

Default Letter Grade; P/NP Option

Instructors

Hellerstein, Jain, Parameswaran, Yan

Reading and Composition Requirement

None of the Reading and Composition Requirement

Simple Requirements

Course Enrollment Requirements Type Prerequisite Requirement COMPSCI 61B, or INFO 206B, or equivalent courses in programming with a C- or better, or Pass; and COMPSCI C100 / DATA C100 / STAT C100, or COMPSCI 189, or INFO 251, or DATA 144, or equivalent upper-division course in data science with a C- or better, or Pass.
--

Repeat Rules

Course is not repeatable for credit.

Credit Restriction Courses. Students will receive no credit for this course if the following the course(s) have already been completed.

DATA
C101 - Data Engineering, COMPSCIC187 - Data Engineering

Credit Replacement Courses. Upon passing, students can use the following course(s) to replace a deficient grade for this course.

DATA
C101 - Data Engineering

Cross-Listed Course(s)

COMPSCIC187 DATA ENGINEERING

Formats

Discussion, Lecture

Durations and Hours

Term Fall and Spring Outside Work
