Key Takeaways

Throughout this professional program, you will:

01 Develop the necessary leadership skills with the vision needed to address the innovation processes of organizations

02 Develop a kit for innovating, incorporating the strategies and tools needed to transform hunches into real-world impact

03 Learn about the main methods and tools used in the design of product families and identify and prioritize solutions for complex problems

04 Learn how to design and develop effective digital platforms in order to build loyal consumer bases and differentiated products

Participant Profile

Directors, VPs and entrepreneurs responsible for product design, engineering, or marketing

Current product leaders and aspiring C-suite executives who want to keep current on trends to accelerate growth

Senior executives looking to align product strategy with business strategy and understand the implications of technology on the product portfolio

Participants are required to have:

- A minimum of ten years of experience working in a managerial position
- At least 3 years of experience in a product leadership role or similar
- International experience is appreciated

Learning Journey

Program Outline

Module 1 | **Leadership & Innovation**
8 weeks

With this module, participants will learn to lead by coming to know themselves better, harnessing their own creativity, and building teams and organizations through the culture of innovation.

Module 3 | **Designing High Impact Solutions with MITdesignX**
8 weeks

This module explores the MITdesignX framework for complex problem-solving to enable professionals, innovators, and decisionmakers in industry, academia,and public service to draw on the unique strengths of the design process. Incorporating design into problemsolving facilitates transdisciplinary collaboration to pursue meaningful, long-term, human well-being.

Module 5 | **Elective Program**
8 weeks

a) Data Leadership
b) Cloud & DevOps: Continuous Transformation
c) Life Cycle Assessment

Module 2 | **Designing Product Families: From Strategy to Implemention**
8 weeks

Today's highly competitive and volatile market is reshaping the way organizations do business. Rapid innovation and mass customization offer a new form of competitive advantage. In response, organizations are required to implement strategies to design and develop an entire family of products.

Module 4 | **Digital Platforms: Designing Two-Sided Markets from APIs to Feature Roadmaps**
8 weeks

Digital platforms and two-sided markets have quickly established themselves as a staple of modern business, presenting new opportunities and challenges alike for engineers, product managers, regulators, and entrepreneurs. However, there continues to be little discussion surrounding why some digital platforms help companies flourish where others have fallen short.

Impact Project

A crucial aspect of the program enables you to apply your learnings to a real-world challenge as you gain insights into the opportunities awaiting a Chief Product Officer.

1 Premium Access / MIT Professional Education ecosystem

Get exclusive access to networking events, live online sessions with speakers and international MIT Alumni network.

2 Professional Development

In turn, you will have the support of a specialized career development coach who will help you enhance and elevate your professional career.

3 Access to the Digital Pathway

Includes over 90 webinars in diverse topics and industry themes. That's around 5520 minutes of expert knowledge.
