- Two electives + Business in Practice
- Two electives + Analytics Portfolio.

You will develop your programming skills in Python, SQL and R, and gain guidance in obtaining optional certifications such as Associate Certified Analytics Professional. You will be given access to a wide-range of additional analytics and data science online courses, and gain exposure to industry-standard software such as Tableau, PyTorch and Large Language Models.

Please note that the module catalogue is subject to change for future years of study, as we evolve our courses in response to the latest developments in academia and industry.

Society (UK), and the required knowledge to pass the certification exam is closely aligned with the core content of this course.

Foreign Language Study

One of the great benefits of this course is that it offers optional free foreign language study in the evenings across Terms One and Two. This is an opportunity to develop the basics of a new language. There is a choice of six different languages, all at beginner–level (please note we are not able to offer classes at intermediate/advanced level).
