Program overview

Data analytics is essential for organizations to make informed decisions and stay competitive in today's data-driven world. As the demand for skilled professionals in this field grows, staying updated with the latest advancements is important. Generative AI (or Gen AI) is one of the most exciting developments in this space, offering powerful tools to enhance data analysis and create new opportunities for business growth.

r what other learners have to say

I'm a fan of edX's new way of learning. Thousands of people can study from anywhere in th world. It's a wonderful idea.

Program Availability

Unfortunately, learners residing in one or more of the following countries or regions will not be able to register for this program: Iran, Cuba and the Crimea region of Ukraine. While edX has sought licenses from the U.S. Office of Foreign Assets Control (OFAC) to offer our programs to learners in these countries and regions, the licenses we have received are not broad enough to allow us to offer this program in all locations. edX truly regrets that U.S. sanctions prevent us from offering all of our programs to everyone, no matter where they live.
