SKILLS PATH

# Business Analytics and Intelligence

0%

Start

0/5

UPDATED
Sep 2026

DURATION
9hr 28m

Thinking like a business analyst requires data analysis and business acumen. This path introduces business analytics and intelligence boiled down to its simplest concepts. Getting started here will help you to launch your knowledge of this topic whether you are coming from a business or an analysis background. When you've completed this path you're ready to dive deeper into data analytics and apply what you learn to business decisions.
