SKILLS PATH

Generative AI for Data Science

0%

Start

0/11

UPDATED
Aug 2026

DURATION
6hr 25m

Generative AI offers powerful ways to speed up and enrich every step of the data science process. This path guides you through how to use GenAI to prepare data, analyze datasets, engineer features, visualize insights, evaluate models, and automate reporting. Along the way, you'll learn best practices for prompt design, ethical considerations, and how to integrate GenAI tools into real-world data science workflows.

Generative AI for Data Science

Watch the following courses to get learning about Generative AI for Data Science!

COURSE

Preparing Data with Generative AI
By Pinal Dave

Dec 2025 • Intermediate • 29m

COURSE

Querying Data with Generative AI
By Mihaela Danci

Jan 2026 • Intermediate • 54m

15

Data Analysis with Generative AI
By David Clinton

Nov 2025 • Intermediate • 43m

COURSE

Feature Engineering with Generative AI
By Xavier Morera

May 2026 • Intermediate • 38m

COURSE

Creating Synthetic Datasets with Generative AI
By Russ Thomas

Mar 2026 • Intermediate • 32m

COURSE

Visualizing Data and Storytelling with Generative AI
By Russ Thomas

Jan 2026 • Intermediate • 23m

COURSE

Model Evaluation and Interpretation with Generative AI
By Gihad Sohsah

Apr 2026 • Intermediate • 58m

COURSE

Automating Data Science Tasks with Generative AI
By Tony Alampi

Feb 2026 • Intermediate • 28m

15

COURSE

Jan 2026 • Intermediate • 22m

COURSE

Responsible and Ethical use of Generative AI in Data Science

By Dr. Lyron H. Andrews

Jan 2026 • Intermediate • 26m

CODE LAB

ChatGPT for Querying Data

By Josh Meier

Apr 2026 • 30m
